

## Hose and coupling kits, with straight hose and DN 7.6 safety coupling

Обновлено: 04.28.24

### Характеристики

|                   |                  |
|-------------------|------------------|
| Температура среды | -20 °C to +60 °C |
| Рабочее давление  | 16 bar           |

### Информация о продукте

|               |               |
|---------------|---------------|
| Размер шланга | 16 mm x 11 mm |
|---------------|---------------|

|               |      |
|---------------|------|
| Рабочая длина | 15 m |
|---------------|------|

### Указания

### Описание

Couplings: High-grade single-handed quick-release coupling and safety coupling in steel / brass zinc-plated for high flow rates, specially designed for all applications with high mechanical wear. Strong, impact- and vibration-resistant construction for challenging applications. Polyurethane hose Exceedingly flexible, extremely kink-resistant and tolerant of dirt spiral hose with high resilience under tear, tensile and impact loads with a long service life and outstanding ageing qualities. It is also UV resistant and has outstanding abrasion resistance.
