

Spiral hose and coupling kits, with quick disconnect couplings DN 7.6

Обновлено: 04.25.24

Характеристики

| | |
|-------------------|------------------|
| Температура среды | -20 °C to +60 °C |
| Рабочее давление | 10 bar |

Информация о продукте

| | | | |
|---------------|----------------|---------------|----------------|
| Ø спирали | 52 mm | Размер шланга | 10 mm x 6,5 mm |
| Размер шланга | 10 mm x 6,5 mm | Рабочая длина | 6 m |

Указания

Описание

Couplings: High-grade single-handed quick-release coupling and safety coupling in steel / brass zinc-plated for high flow rates, specially designed for all applications with high mechanical wear. Strong, impact- and vibration-resistant construction for challenging applications. Polyurethane hose Exceedingly flexible, extremely kink-resistant and tolerant of dirt spiral hose with high resilience under tear, tensile and impact loads with a long service life and outstanding ageing qualities. It is also UV resistant and has outstanding abrasion resistance.
