

3/2 and 5/2-way spool valves with NAMUR style interface

Обновлено: 04.30.24

Характеристики

| Рабочие среды | Air, neutral gases, filtered |
|---------------------------|------------------------------|
| Рабочее давление | 1.5 - 8 bar |
| Рабочая температура | +5 °C to +50 °C |
| Подключение к электросети | Plug connector PG 9 |
| Корпус | Aluminium |
| Уплотнение | Нитрильный каучук |

Информация о продукте

| Напряжение | 24 V DC |
|------------------|---------|
| Port 1 | G 3/8" |
| Соединение 3 + 5 | G 1/4" |

| Соединение 3 + 5 | G 1/4" |
|------------------|------------|
| DN | 10 |
| Расход nom. | 1650 l/min |

DN =номинальный диаметр, номинальный внутренний диаметр

Указания

Описание

Pilot-operated 3/2 and 5/2-way spool valves with threaded ports and a NAMUR style interface. Combines high-quality design with a low price. By adding the conversion plate supplied with each valve, the device can be adapted to a 3/2-way function. The valve is turned on by a continuous signal. Turning off causes the piston to be returned to its initial position under pressure. Includes a manual operator as standard.
