

Характеристики

Рабочая температура	-15 °C to +100 °C
Рабочее давление	Max. 40 bar
Резьба, описание	G thread acc. DIN EN ISO 228-1
Шар	Chrome-plated brass
Корпус	Nickel-plated brass (outside); Brass with a bare metal surface (inside)
Уплотнение шара	PTFE
маховик	Plastic
Уплотнение шпинделя	Нитрильный каучук

Информация о продукте

DN	50
Резьба	G 2
B	123 mm

B	123 mm
A	130 mm
L	110.2 mm

DN = номинальный диаметр, номинальный внутренний диаметр

Указания

Описание

Brass ball valves in the standard series with fine adjustment. Unlike our classic standard ball valves (open-close function), this model features a special stem technology that allows finely modulated opening and closing of the line.

The flow rate can be regulated extremely precisely as a result. The cock is made of low-lead brass with a bare brass surface on the inside.

It is thus safe to use with drinking water.

This valve complies with the European standard EN 13828 and the working paper DVGW W 570.
