### Описание

Purely pneumatic vacuum ejector that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C.

### Дополнительная информация

Important: Order two connection plugs per ejector. A cable set is included with the compact ejector with automatic air-saving.NC blow-off valve, filter, silencer, non-return valve integrated.
