

### Характеристики

<b>Вязкость</b>	Medium viscosity
<b>Прочность</b>	High strength
<b>Применение</b>	Screw locking without pretreatment
<b>Термостойкость</b>	-60 °C to +180 °C

### Указания

Прочие данные только по запросу.

### Описание

High-strength gluing of passive materials, such as stainless steel or aluminium, without pretreatment. Shorter assembly time. High strength. Fast finger strength (2 - 5 minutes). Fast final strength (2 - 4 hours). No activator required for pretreatment, hence no additional solvent pollution.
