

Differential pressure flow meter

Обновлено: 04.10.24

Характеристики

Область температур	0 - 50 °C
Рабочее давление	0 - 16 bar
Рабочие среды	Compressed air, neutral gases
Рабочее напряжение	24 В пост.тока
Дисплей	background lighting
Дополнительная информация	Ausgabe Durchflusswerte analog 0 - 10 V oder 4 - 20 mA Messsystem: Differenzdruckverfahren

Указания

Прочие данные только по запросу.

Описание

Differential pressure measuring system for detecting changes in flow rate or consumption and measuring leakage and energy efficiency. There is a differential pressure at the sensor as soon as a fluid starts to flow. Fast and accurate measurements can be achieved in this way. This robust instrument in a modern design offers a high level of safety (codable) and requires no maintenance.

Дополнительная информация

Output flow rate analogue 0 to 10 V or 4 to 20 mA
Measuring system: differential pressure method
