

Hose and coupling kits, with straight hose and DN 7.6 safety coupling

Обновлено: 04.25.24

Характеристики

Температура среды	-20 °C to +60 °C
Рабочее давление	16 bar

Указания

Прочие данные только по запросу.

Описание

Couplings: High-grade single-handed quick-release coupling and safety coupling in steel / brass zinc-plated for high flow rates, specially designed for all applications with high mechanical wear. Strong, impact- and vibration-resistant construction for challenging applications. Polyurethane hose Exceedingly flexible, extremely kink-resistant and tolerant of dirt spiral hose with high resilience under tear, tensile and impact loads with a long service life and outstanding ageing qualities. It is also UV resistant and has outstanding abrasion resistance.
